RE: Power BI Developer

Dear Hiring Manager,

After learning your organization's approach to the job positions available, I became very interested in learning more about the positions in your organization, especially the Power bi Engineer as I am having strong technical skills background for the role.

I am having around Two years of experience on GitHub, Power bi, and Apache Ant technologies and I worked on several projects in my previous organization in one of the projects I worked on as a team leader who led the team success with the appropriate deliverable.There is more depth on my experience and skills in my resume which I would appreciate you looking over. I strongly believe that you will find a well-qualified applicant for the Power BI Developer position after reviewing my application.

My high professional standards, problem-solving abilities, leadership experience, and effective communications skills are a perfect match for your organization. Last quarter I had the privilege of implementing a new work method among the team members which is very helpful in terms of achieving the targets and I believe my inventiveness would benefit your organization as well.

 I would very much like to be part of your team. Please feel free to contact me with any questions by my email id. I look forward to discussing this position and the contributions I can make to your team structure.

Warms Regards,

Naveen.
